Regional Parks

There are 23 regional parks in the system, from Langley to Bowen Island. They protect a diversity of landscapes and habitats including beaches, creeks, lakes, forests, mountains and wetlands.

Regional parks provide homes for wildlife as well as places for us to hike, cycle, picnic and swim.

But did you know they help provide clean air, clean water and health benefits? Research shows that just being in nature has a positive effect on your physical and mental health.

Regional Greenways

There are five regional greenways: Brunette-Fraser, Delta South Surrey, North Alouette, Pitt River and Seymour River. These pedestrian and cycling routes connect important greenspaces and provide corridors for wildlife. They also offer recreational and, in some cases, attractive commuting options for people.

Regional Park Reserves

Think of these as parks in waiting. Public access is limited until plans and facilities are in place.

Ecological Conservancy Areas

These areas are set aside to protect sensitive natural areas and are closed to the public.

All of these places are located on the shared territories of many Indigenous peoples, including 10 local First Nations: ǫ́iǫ́y (Katzie), ǫ́ʷɑ:ńłəńh (Kwantlen), kʷikʷəłəm (Kwikwetlem), máthxwi (Matsqui), xʷməθkʷəy̓əm (Musqueam), qiqéyt (Qayqayt), se'mya'me (Semiahmoo), Skwxwú7mesh úxwumixw (Squamish), scəwáθen məsteyəxʷ (Tsawwassen), and sə́ilwətaʔ (Tseil-Waututh).
