

Other ways to lend a helping hand

Report invasive plants

» Download the 'Report a Weed' App from reportaweedbc.ca to identify and report invasive plants.

» In Burnaby, email invasivespecies@burnaby.ca or call 604-294-7460.

Get involved

Learn more about how to volunteer to remove invasive species with the City or through local organizations:

» burnaby.ca/streamkeepers

» iscmv.ca/programs/burnaby-stewardship

» [meetup.com](https://www.meetup.com) and join 'Metro Vancouver Ecological Restoration Team' or the 'Lower Mainland Green Team'.

Help Stop the Spread of Invasive Plants

What is an invasive plant?

Many plants have been introduced to this region from other continents. Some of these plants are considered 'invasive' because the predators and diseases from their native regions are not here to keep them under control, so they spread rapidly and can cause many problems.

Why are invasive plants a problem?

In some cases, invasive plants:

- » damage sensitive ecosystems, alter stream flows, and increase soil erosion
- » are toxic to people and animals
- » are highly flammable and increase the risk of wildfires
- » reduce crop yields and harm livestock
- » displace traditional food or medicinal species used by Indigenous peoples
- » damage buildings and pavement
- » are costly to manage

In fact, municipalities in Metro Vancouver spend over \$2 million per year controlling 11 priority invasive species.

How can you help?

Choose garden plants wisely

Research new plants for the garden to avoid picking an invasive species. (Yes, some are still sold in garden stores.)

Check out growgreenguide.ca for non-invasive plant and garden design suggestions.

Keep invasive plants under control

Keep fast-spreading invasive plants such as ivy, periwinkle and yellow archangel contained. Consider hiring a professional to control highly invasive species such as knotweeds and giant hogweed.

Be sure to replace invasive plants with a non-invasive alternative.

Put yard waste in its place

Do not place invasive plants in your backyard composter as the temperature will not become hot enough to completely destroy the seeds and roots.

To reduce the spread of invasive species, please dispose of yard waste and soil appropriately. Visit burnaby.ca/garbageandrecycling for more information.
